

OpenEMR Learning Resources

Curated videos, official docs, hands-on practice exercises.

Audience: You — to study and add data manually for boss demo

Goal: Learn what each tab does by watching a video, then trying it locally

Application: http://localhost/open_cms

Demo login: admin / pass

Document date: 22 May 2026

How to use this guide

Open the application in one browser tab, the video in another. Watch a step, pause the video, then do the same step in your local install using the demo patients (Rajesh Kumar, Priya Sharma, Amit Patel, Neha Gupta, Vikram Singh) until it feels natural.

All links below were verified from a live web search; older video years are kept where the menu structure is still recognisable.

1. Start here — overview videos

Watch one of these first so the rest of the tabs make sense in context.

Video	What it covers	Notes
OpenEMR Patient Complete Workflow Step-by-Step	Reception → encounter → billing → checkout, end-to-end	May 2025 — closest to the version you run
OpenEMR Tutorial for Beginners	Install + first-look UI walkthrough	Jul 2025
MI2 OpenEMR 5 Intro 1 Walkthrough	The tabs layout — top menu by top menu	2017, menu structure unchanged
OpenEMR Tutorial — Getting started with OpenEMR	Login, navigation basics	2016, still relevant

- [How-to Use OpenEMR — playlist](#)

2. Official documentation

The source of truth. Use these when a video skips a step.

- [OpenEMR 7.0.4 Users Guide](#) — current
- [OpenEMR 7.0.1 Users Guide](#) — slightly older, easier-to-read screenshots
- [HOWTO: Create a New Patient Record \(v7\)](#)

3. Tab-by-tab resources & practice

Calendar · Finder · Flow Board

Resource	Use
Setting up your clinic or medical practice (1 of 2)	Facility, providers, calendar categories
OpenEMR Users Guide — Calendar section	Click-by-click reference

PRACTICE IN YOUR LOCAL INSTALL

1. **Calendar** → click any empty cell tomorrow → book a 30-minute appointment for *Neha Gupta* with reason "Follow-up".
2. **Finder** → search **kum** → confirm Rajesh appears at the top.
3. **Flow** → check Rajesh in for his next visit → move him through *Waiting* → *In Exam* → *Checkout*.

Messages

Resource	Use
Users Guide — Messages chapter	Inbox, sending, recalls

PRACTICE

1. Compose a new message → To **admin** → Subject "Test from learning session".
2. From Rajesh's chart, click the **Notes** widget → send a note linked to him.

Patient — Dashboard, Demographics, Visit Forms

Resource	Use
HOWTO: Create a New Patient Record (v7)	Step-by-step new patient
OpenEMR Tutorial — Documenting a Patient's Visit Encounter	Encounters and SOAP notes
VistACan Walkthrough — Upload Patient Documents on OpenEMR	Documents tab inside the chart

PRACTICE — ADD A NEW PATIENT MANUALLY

1. **Patient** → **New/Search** → **Add New Patient**.
2. Fill: First "Anita", Last "Verma", DOB **1988-03-12**, phone **9000011111**, language Hindi, sex Female.
3. Save → open her chart → confirm she appears in Finder.
4. From her chart, click **Add Allergy** → "Aspirin" → severity *moderate* → save.
5. Click **Add Problem** → "Migraine" → ICD-10 **G43.909** → save.

Fees (Billing) · Reports (Financial)

Resource	Use
Openemr Tutorial — New Encounter Patient Visit & Coding	Fee Sheet + CPT / ICD-10 coding
The Complete OpenEMR Billing, RCM & Reporting Guide (Capminds)	Long-form written billing guide

PRACTICE — ADD A CHARGE MANUALLY

1. Open Rajesh's encounter (the seeded one, encounter 101).
2. **Fee Sheet** → add CPT code **99213** (Office visit, established) → save.
3. Add ICD-10 **I10** (essential hypertension) → save.
4. **Checkout** → take a ₹500 cash payment → print receipt.
5. **Reports** → **Financial** → **Cash Rec** → confirm the ₹500 shows under today.

Inventory · Ensora eRx (Prescriptions)

Resource	Use
Users Guide — Pharmacy / Prescriptions chapter	Drugs, prescription writing

PRACTICE

1. **Inventory** → **Management** → **Add Drug** → "Cetirizine 10mg" → NDC code **NDC-00006-0006** → active = yes.
2. Open Priya's chart → **Visit Forms** → **Prescription** → write "Cetirizine 10mg, 1 tab at night, 10 days".

Admin — Users, Globals, Lists, Backup

Resource	Use
Setting up your clinic or medical practice — part 1 of 2	Users, providers, facility
Getting started with OpenEMR	First-login admin tasks

PRACTICE

1. **Admin** → **Users** → **Add New User** → username "reception1", role "Front Office".
2. **Admin** → **Globals** → **Appearance** → **CSS Style Sheet** → confirm "Matrix Bricks" is selected.
3. **Admin** → **Lists** → pick "Marital Status" → add a new option "Cohabiting".

4. Install / dev reference

Resource	Use
How to Install OpenEMR Using XAMPP	Matches your stack exactly
OpenEMR Easy Docker Development	If you ever migrate to Docker

5. Search-strings for any tab not covered above

Paste these into YouTube directly:

- OpenEMR <feature name> tutorial — e.g. *OpenEMR fee sheet tutorial*
- OpenEMR <feature name> walkthrough
- OpenEMR <feature name> demo 2024
- OpenEMR 7 <feature name> — pins results to the modern UI

Tabs / features worth searching for:

- OpenEMR Recalls tutorial
- OpenEMR Patient Flow Board
- OpenEMR Groups module
- OpenEMR Procedures lab orders
- OpenEMR Reports clinical
- OpenEMR FHIR API
- OpenEMR portal patient
- OpenEMR forms registry

6. Suggested 1-week learning plan

About 30 minutes a day.

Day	Watch	Practice
1	Getting started (MI2 Intro)	Log in, click every top menu, no changes
2	Patient Complete Workflow	Add new patient "Anita Verma"
3	Documenting an Encounter	Create encounter for Anita, add SOAP note
4	Coding / Fee Sheet video	Add CPT + ICD-10, take a payment
5	Setting up your clinic 1/2	Admin → Users, Lists, Globals
6	Upload Patient Documents	Upload a sample PDF into a chart
7	Free practice	Run a complete day: book → check-in → encounter → bill → report

7. When you get stuck

- **Community forum** — community.open-emr.org. Searchable, replies usually within a day.
- **OpenEMR project wiki** — www.open-emr.org/wiki. Every feature has a HOWTO page.
- **GitHub issues** — github.com/openemr/openemr/issues. Search the error message; many already have answers.
