

OpenEMR Tab & Module Reference Guide

A walkthrough of every menu, written so anyone can lead the demo.

Product: OpenEMR — Matrix Bricks branded build

Audience: Internal — sales / management demo

Application URL: http://localhost/open_cms/interface/login/login.php

Demo login: admin / pass

Demo patients: Rajesh Kumar, Priya Sharma, Amit Patel, Neha Gupta, Vikram Singh

Document date: 22 May 2026

Contents

| 8. Fees (Billing) | 17. Cross-cutting features |
| 9. Modules | 18. Suggested 15-minute demo |

Before you start

This guide walks through every top-level menu in the OpenEMR build that ships with the Matrix Bricks brand theme. For each tab you get:

- **What it is** — a one-line definition.
- **Who uses it** — the role that lives in that tab day-to-day.
- **Demo flow** — the exact clicks to show during a walkthrough.
- **Talking point** — a sentence to repeat to your boss / a prospect.

The screen mockups in this PDF are *simplified illustrations* of the live UI — they are designed to print cleanly. Show the live application alongside this guide for the full visual effect.

TALKING POINT FOR YOUR BOSS

"Every clinic workflow has a tab. The doctor's day, the receptionist's day, the manager's day — each is a different vertical strip of this menu."

1. Calendar

Calendar — Day / Week / Month

admin@CSAB Clinic

Calendar

Finder

Flow

Messages

Patient

Fees

Reports

Admin

This week

Mon 2 appts	Tue Rajesh K.	Wed Priya S.	Thu	Fri Amit P.	Sat Vikram S.	Sun
----------------	------------------	-----------------	-----	----------------	------------------	-----

Click any empty cell → "Add Event". Click an existing appointment → check-in, edit, cancel.

What it is

The scheduling grid — Day / Week / Month view of every appointment across providers and rooms.

USED BY Receptionist (books & reschedules), Doctor (sees daily queue).

DEMO FLOW

1. Open **Calendar** — see five upcoming demo appointments: *Lab review, BP recheck, HbA1c follow-up, Throat culture result, Physiotherapy referral*.
2. Click an empty slot → an **Add Event** dialog opens (category, status, room, recurrence).
3. Click an existing slot → quick actions (check-in, edit, delete).

TALKING POINT FOR YOUR BOSS

"This is the heartbeat — every front-desk action starts here."

2. Finder

Patient Finder5 demo patients loaded

Calendar

Finder

Flow

Messages

Patient

Search: kum_

Name	DOB	Phone	Last visit
Rajesh Kumar	15 Jun 1982	9876543210	14 days ago
Priya Sharma	22 Nov 1990	9811122233	10 days ago
Amit Patel	09 Feb 1975	9798765432	7 days ago

What it is

A live patient-search grid. Filter by name, DOB, phone, ID — sort by any column.

DEMO FLOW

1. Type kum → Rajesh Kumar appears.
2. Click his name → opens the chart in a new tab inside the app.

TALKING POINT FOR YOUR BOSS

"Type two letters of any field and the patient list narrows in real-time."

3. Flow Board

Flow — Patient Tracker

Live

Patient	Status	Room	Waited
Rajesh Kumar	In Exam	3	4 min
Priya Sharma	With Doctor	1	12 min
Amit Patel	Waiting	—	2 min
Vikram Singh	Checkout	—	—

What it is

Real-time visual board — checked-in, with provider, in exam room, billed, checked-out. Like an airport departures board for the clinic floor.

USED BY Nurses and reception desk running the day.

TALKING POINT FOR YOUR BOSS

"Anyone walking past the front desk knows who is waiting and how long."

4. Recalls

What it is

Reminders for patients who need to come back — annual physical, vaccine, follow-up. Generates printable, e-mailable, or SMS-able lists.

DEMO FLOW

1. Open **Recalls** → filter by date range and recall type.
2. Print, or export CSV for outbound calls / SMS blast.

TALKING POINT FOR YOUR BOSS

"This is how a clinic keeps revenue predictable — no one falls through the cracks."

5. Messages

Inbox — admin

3 unread

From	Subject	Patient	Status
Dr. Iyer	Lab result ready	Amit Patel	New
Front Desk	BP recheck no-show	Priya Sharma	Reply
Pharmacy	Refill confirmed	Vikram Singh	Done

What it is

The internal inbox. Phone messages, lab notifications, intra-staff notes, "while you were out" slips — routed to the right provider.

TALKING POINT FOR YOUR BOSS

"Replaces sticky notes on a monitor. Every message is auditable and tied to the patient record."

6. Patient (clinical core)

Patient Dashboard — Amit Patel (PID 4)

Age 51 · Male

Allergies	Problems	Medications	Vitals (latest)
Sulfa drugs mild	Type 2 Diabetes (E11.9)	Metformin 500 mg BID	BP 136/88 · BMI 29 · HR 90

Visit history (1 of 1 demo encounter):

Date	Reason	Provider	Bill
7 days ago	Diabetes consultation	admin	CPT 99214 · ₹130

What it is

The clinical core. Demographics, allergies, problems, medications, vitals, encounter history, lab results, documents — all in one chart.

Sub-tabs

Sub-tab	Purpose
New / Search	Register a new patient or open an existing chart.
Dashboard	The patient hub — see everything at a glance.
Visits	Calendar · Create Visit · Current visit · Visit history.
Records	Export full chart as PDF / CCDA / FHIR for referral / patient pickup.
Visit Forms	SOAP note, Vitals, Procedure Order, Lab Order, Eye exam, custom forms.

TALKING POINT FOR YOUR BOSS

"Everything a doctor needs in one chart — no swapping screens, no swivel-chair."

7. Groups

What it is

Group / class visits — diabetes education, antenatal class, counselling. Track attendance, bill at the group level.

DEMO FLOW

1. **New** → "Diabetes Education Q3" → add Amit Patel + Priya Sharma.
2. **Create Visit** → mark both as attended → close.

TALKING POINT FOR YOUR BOSS

"One session, many patients, one chart entry — huge time saver for clinics running group programmes."

8. Fees (Billing)

Fee Sheet — Encounter 103 / Amit Patel

Provider: admin

Code	Type	Description	Fee
99214	CPT4	Office visit, moderate	₹130.00
E11.9	ICD-10	Type 2 diabetes	—

The revenue side of the application

Sub-tab	Purpose
Fee Sheet	Add CPT / ICD-10 codes to the current encounter.
Charges	Override price per code.
Payment	Take a payment at point of service.
Checkout	Combined payment + receipt at end of visit.
Billing Manager	Pending claims; submit to insurer / clearinghouse.
Batch Payments	Apply one insurer payment across many claims.
Posting Payments	EOB / ERA matching.
EDI History	Audit trail of every X12 claim file submitted.
Claim File Tracker	Status of each outbound claim.

DEMO FLOW

1. Open Amit Patel's last encounter → **Fee Sheet** → see CPT 99214 + ICD-10 E11.9 already loaded from seed data.
2. **Checkout** → take a partial payment → printable receipt.
3. **Billing Manager** → pending-claim list with all five demo patients.

TALKING POINT FOR YOUR BOSS

"From the doctor's pen to the insurer's wire transfer — this is the whole revenue cycle in one tab."

9. Modules

What it is

Pluggable add-ons. The stock build ships **Manage Modules** — install, enable, or disable extras such as FHIR API, OAuth2, CCDa, Direct Mail, e-prescribing, image viewers.

TALKING POINT FOR YOUR BOSS

"OpenEMR is a platform. Regulatory and interop features ship as modules so we deliver them on the customer's schedule, not the vendor's."

10. Inventory

Drug Inventory — Management

5 SKUs

Drug	NDC	Size	Active
Paracetamol 500 mg	NDC-00001-0001	500 mg	Yes
Amoxicillin 250 mg	NDC-00002-0002	250 mg	Yes
Metformin 500 mg	NDC-00003-0003	500 mg	Yes
Amlodipine 5 mg	NDC-00004-0004	5 mg	Yes
Atorvastatin 10 mg	NDC-00005-0005	10 mg	Yes

Sub-tab	Purpose
Management	Add / edit drugs and stock counts.
Destroyed	Log expired or damaged stock for compliance.

11. Procedures (Lab / Imaging)

Order → send → receive → review. Closed-loop lab workflow without leaving the chart.

Sub-tab	Purpose
Providers	Labs / radiology centres you send orders to.
Configuration	Compendium of orderable tests per provider.
Load Compendium	Bulk-import a test catalogue.
Pending Review	Results waiting on a doctor's eyes.
Patient Results	Per-patient lab history.
Lab Overview	Day-level review queue.
Batch Results	Match HL7 inbound results to outbound orders.
Electronic Reports	PDF lab reports.
Lab Documents	Scanned paper results.

TALKING POINT FOR YOUR BOSS

"Order, send, receive, sign — closed-loop lab workflow without ever leaving the chart."

12. Ensora eRx (Electronic Prescribing)

Direct connect to an e-prescribing network (NewCrop / DrFirst). Sends prescriptions electronically to the patient's pharmacy.

DEMO FLOW

1. Open patient → **Visit Forms** → **Prescription** → fill drug / dose / refills.
2. **Sign & Send** — routes to the eRx gateway.

TALKING POINT FOR YOUR BOSS

"No more handwritten scripts. The prescription lands at the pharmacy before the patient walks out."

13. Admin

System configuration. Every choice is auditable; nothing about how the system behaves is hard-coded.

Sub-tab	Purpose
Users	Add / disable staff and assign roles.
Practice	Facilities, providers, taxonomy codes.
Address Book	Referring providers, partner organisations.
Codes	Manage ICD-10, CPT, HCPCS, SNOMED, LOINC dictionaries.
Patient Reminders	Recall rules schedule.
Forms	Register or hide visit forms.
Practice Settings	Language, encounter title, defaults.
Lists	Drop-down values used across the app.
Files	Uploaded reference docs (policies, fee schedules).
Backup	DB + filesystem export.
System Logs	Audit trail of every login and data change.
Globals	Every tunable setting (Appearance, Calendar, Locale...).

DEMO FLOW

1. **Globals** → Appearance → CSS Style Sheet → confirm *Matrix Bricks* is active.
2. **Users** → Add User → assign role *Physician* or *Front Office*.
3. **System Logs** → see every login (auditable for HIPAA / DPDP).

TALKING POINT FOR YOUR BOSS

"Operations can tune the system without us shipping code. Nothing is hard-coded."

14. Reports

Read-only analytics and exports.

Top categories

- **Clinical** — diagnoses, procedures, medications, immunisations, lab-result trends.
- **Visits** — appointment volume, no-show rate, by-provider load.
- **Financial** — Cash Rec · Front Rec · Pmt Method · Collections & Aging · Patient Ledger · Revenue by Service Code · Payment Processing.
- **Inventory** — list, activity, transactions.
- **Procedures** — pending results, pending follow-up, statistics.
- **Insurance** — payer distribution, indigent care log, unique subscribers.
- **Statistics** — clinic-wide KPIs.
- **Services / Background Services / Direct Message Log / IP Tracker** — operational reports.

DEMO FLOW

1. **Reports** → **Clinical** → **Diagnoses** → see ICD-10 distribution across demo patients (I10, E11.9, M54.5, J02.9).
2. **Reports** → **Financial** → **Cash Rec** → today's intake.
3. **Reports** → **Visits** → appointment counts.

TALKING POINT FOR YOUR BOSS

"Boss asks 'how was last month' → one click, dashboard answer."

15. Miscellaneous

Useful tools that don't fit a clinical workflow.

Sub-tab	Purpose
Portal Dashboard	Patient-portal admin: messages, signups, intake.
Dicom Viewer	Radiology image viewer (CT / MRI / X-ray).
Patient Education	Send leaflets / care instructions to a patient.
Authorizations	Approve pending demographic / chart changes.
Fax / Scan	Inbound fax queue, document scanning workflow.
Chart Tracker	(Paper-chart practices) check-out / check-in.
Office Notes	Practice-wide bulletin board.
Batch Communication	Mass email / SMS to a patient cohort.
Configure Tracks	Customise the Flow Board statuses.
New Documents	Quick upload to a patient's chart.
Blank Forms	Print blank Demographics / Superbill / Referral.

16. Popups

Quick-action pop-out windows for the current patient — always one click away from the chart.

- **Issues** — problem / allergy / medication list popup.
- **Export / Import** — quick CCD / PDF.
- **Appointments** — book without leaving the chart.
- **Superbill** — printable encounter charge sheet.
- **Payment / Checkout** — quick capture.
- **Letter** — referral / sick-note / school excuse from a template.
- **Chart / Barcode / Address labels** — physical printing.

TALKING POINT FOR YOUR BOSS

"All the small, frequent paperwork tasks — designed to take seconds, not minutes."

17. Cross-cutting features

- **Role-based access (ACL)** — every menu item is gated by a role. A receptionist literally can't see the Reports tab if you don't want them to.
- **Audit log** — every read and write is logged (HIPAA & India DPDP ready).
- **APIs** — REST + FHIR + CCD + HL7 → integrate with labs, HIEs, government registries, analytics.
- **Themes** — fully re-skinable. This build runs the Matrix Bricks brand SCSS (red / yellow / black).
- **Multi-language** — UI labels live in a translation table. Ship in English + any regional language without touching code.

18. Suggested 15-minute demo

1. **Login** — branded login (black background, white card, red headings, yellow CTA).
 2. **Calendar** — point at seeded appointments.
 3. **Finder** → open Amit Patel.
 4. **Patient Dashboard** — show allergies (Sulfa), problem (Diabetes), medication (Metformin), vitals from last visit (BP 136/88, BMI 29).
 5. **Visit History** → open his Diabetes consultation encounter.
 6. **Fee Sheet** — show CPT 99214 + ICD-10 E11.9 already billed.
 7. **Checkout** — take a sample payment.
 8. **Messages** — send a message to admin.
 9. **Reports** → **Financial** → **Cash Rec** — today's intake.
 10. **Admin** → **Globals** → **Appearance** — show the theme picker.
 11. Close with **Modules** — plant the "we can extend this" idea.
